

# INTRODUCING **STiK**, THE WORLD'S FIRST PERSONAL FISHING CRAFT!

## **Entire deck is fishable space**

It's like a mini skiff/bass boat with the front two-thirds of the boat available for fishing

## **Streamlined hull, unmatched stability**

Specially designed for maximum stability; you can easily stand up to fish

## **Goes where other boats can't**

Floats in just 3 inches of water, will plane in just 4 to 6 inches

## **Unique 4-stroke jet-driven 17.5 hp engine**

Electric start engine is quiet, runs on gasoline and reaches a top speed of 27 mph!

**STiK** Boats™

# STIK IT to the fish!

Fishing is all about the experience, and fishing from a **STIK BOAT** is just that, a great one! With push-button ignition and a joystick, you'll feel like a kid again. Getting to the fish is now a big part of the fun. Just wait until you stand almost at water level and do battle with a nice fish. A **STIK BOAT** offers a connection you simply can't get from any other powered fishing boat.

A **STIK BOAT** is easy to store, easy to trailer, easy to launch and a whole lot of fun to fish from. A **STIK BOAT** is part kayak, part personal watercraft, part skiff and part bass boat, all rolled up into one amazing fishing machine!

## STIK BOATS ARE LOADED WITH FEATURES TO MAKE FOR A FUN FISHING EXPERIENCE

- You drive a **STIK BOAT** with a joystick (adjustable), so you know it's fun; just pull the trigger and go!
- Electric start via ON button. OFF button shuts motor down
- Folding padded seat with back rest
- Built-in, three-part stainless steel reinforcing seat mount system
- Adjustable foot pegs for driving comfort
- Generous under-deck storage area for paddles, life-jackets, etc.
- Insulated ice compartment in floor with drain
- Dry storage inside console
- Six factory-threaded accessory mounts; let's you attach depth finders, rod holders, virtually any accessory you might want
- Automatic bilge pump (with manual switch), plus maintenance-free engine compartment bilge pump
- EPS-foam-filled fiberglass hull with gel coat exterior
- Transportable on most PWC trailers
- 141.7 inches long, 37.8 inches wide, 250 lbs.
- Weight capacity: 350 lbs.
- Available in white or tan/white

## UNIQUE 4-STROKE, JET-DRIVEN 17.5 HP ENGINE WAS CUSTOM-DESIGNED FOR THE JOB

Located dead center and behind the operator, the custom-designed 17.5 hp jet-driven four-stroke engine in a **STIK BOAT** was specifically designed for the unique performance characteristics required.

- 17.5 hp four-stroke engine is quiet, runs on gasoline and is ethanol compliant
- Engine is electric start, has a 3.7 gallon fuel capacity and a 35-40 mile range, and gives you two hours of full-throttle operation
- Jet-driven pump unit is designed to create optimum performance for the size and weight of a **STIK BOAT**; it's quick to reach plane and maximum top end speed (27 mph)
- Cast aluminum impeller is engineered for longevity
- Enclosed coolant system eliminates problems of running salt or dirty water through the system; raw water is pumped through stainless steel inner coolers, cooling the anti-freeze that then cools the engine and engine oil. The coolers easily back-flush after use to clean.
- Dual over-heating sensors will shut down the engine if the temperature ever exceeds safe levels
- External oil drain and easily accessible oil filter keep maintenance simple
